

## Adobe ILLUSTRATOR CS4 ESSENTIALS

### 2 Day Course

*Design quickly and confidently with new Adobe® Illustrator® CS4 software, and deliver easily across tools and media thanks to tight integration with the Adobe Creative Suite® family of products. New features such as multiple artboards, a Blob Brush tool for intuitive vector painting, and transparency in gradients with on-object controls invite you to explore more efficient and creative ways of working.*

#### Course Outline

Adobe Illustrator is the industry-leading vector graphics software that enables you to produce extraordinary graphics for print, video, the web, and mobile devices. It is a very sophisticated graphics program capable of creating complex illustrations and type effects. This Essentials course will give you the basics to build on plus the most effective ways to integrate Illustrator into your workflow.

#### Who should attend

Graphic designers, or people transitioning into design related jobs who need to create illustrations, logos, maps, graphs, diagrams, advertisements, or other graphic documents. They may have little or no experience with Illustrator. They may already use InDesign and Photoshop.

The course on each day runs from 9.30 am to approximately 4.30pm.

#### COURSE CONTENT

##### • **Adobe Illustrator CS4 Overview**

- Introducing Adobe Illustrator CS4
- Adobe Illustrator Creative Suite Integration
- Understanding Vector Graphics
- Learning the interface
- Create a Custom Workspace

##### • **Creating a new document**

- New Document Settings
- Creating Multiple artboards
- Export & print multiple artboards
- 

##### • **Creating Simple Shapes**

- Draw Basic Shapes with the Shape Tools

- Draw Basic Shapes with the Line Tools

##### • **Understanding and Applying Colour**

- Colour fills and strokes
- Colour swatches and libraries
- Applying colour
- Creating and saving new colours

##### • **The Drawing Tools**

- Draw Paths with the Pencil Tool
- Draw Paths with the Brush Tool
- Draw Paths with the Pen Tool

##### • **Manipulate Shapes, Objects and Paths**

- Modify Existing Shapes to Create New Shapes
- Merge and divide objects
- Duplicate and Resizing Objects

##### • **Using Layers**

- The Layers Palette
- Managing your work with Layers
- Template Layers

##### • **Creating a Logo**

- Creating a multi-use logo
- Saving and exporting for multi-use

- How to create sophisticated artwork and graphics for print, web, interactive, mobile and motion designs.
- The basics of how to use Illustrator's powerful drawing tools.
- Logo creation and special type effects.
- Experiment, create and apply colours, patterns and gradients.
- Streamline your workflow and manage your assets using symbols libraries & Adobe Bridge.

## Adobe ILLUSTRATOR CS4 ESSENTIALS

### 2 Day Course (continued)

- **Live Trace and Live Paint**

- Live Trace an existing piece of artwork
- Tracing options
- Converting to a Live Paint object
- Colour a Live Paint object

- **Symbols Libraries**

- Using Symbols Libraries
- Creating a New Symbol
- Sharing Libraries

- **Gradients and Patterns**

- Creating and saving Gradients
- Applying Gradients
- Creating and saving Patterns
- Applying Patterns
- Gradient and Pattern Libraries

- **Creating Complex Objects**

- Joining Shapes, Objects and Paths
- Applying colour, gradients and shading

- **Masking**

- Creating simple Clipping Masks
- Manipulating Masks

- **Type**

- Type tools
- Create Type on a Path
- Create Outlined Type
- Apply an Envelope Distort to Type
- Create Type Masks

- **Creating an Advertisement**

- Page Layout, Guides and Measurements
- Import a Graphic
- Align Objects
- Apply Colours
- Import and Style Body Text
- Wrap Text
- Export a File

- **Managing Assets with Adobe Bridge**

- Explore the Adobe Bridge Environment
- Apply Metadata and Keywords
